OUR FOUNDER

Edward Campbell Simmons

"A Jobbers First Duty is to Help His Customers to Prosper"

E. C. Simmons

Foreword

To The Hardware Trade:

We take pleasure in presenting to you the twenty-first catalog of the Simmons Hardware Company. As you know, this company was the first jobber to build a catalog for the retail hardware trade. It was our founder's maxim then—as it is ours now—that A JOBBER'S FIRST DUTY IS TO HELP HIS CUSTOMERS TO PROSPER. This catalog is only one evidence of our desire to help you prosper.

Because of its clearcut illustrations and descriptions, it can be used very profitably by every dealer—not only in buying, but also in selling. We hope that you will refer to it at every opportunity.

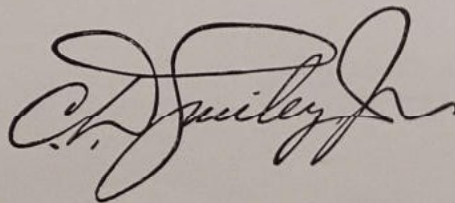

The new U catalog is the result of many months of intensive work. Every item is listed in its logical place and is easy to locate. Therefore we ask that you go through it carefully and familiarize yourself with the tremendous stock of merchandise it represents.

Our complete line of KEEN KUTTER merchandise is included and we solicit your inspection of it. KEEN KUTTER is a synonym for QUALITY. It has no substitute.

We are endeavoring to give service of a quality equal to the quality of our goods, and we invite and welcome your suggestions for the improvement of this service.

We hope our catalog will be the major reference book of your business.

Respectfully yours,

INDEX

MAIL ORDERS

The Merchant of to-day, in order to sell a large variety of goods, will find it more convenient and decidedly to his interest to place his orders more frequently than was the practice some years ago.

Improved facilities in Railroad, Truck and Air Mail service have made it possible to order by mail the items shown in this catalogue just as you need them, and by our prompt service in making shipments the day order is received you can do a larger volume of business and make more money, with the same capital, than you could by stocking up heavily or buying goods in large quantities.

By making frequent calls on our **Mail Order Department**, you will be able to keep your stock complete and up-to-date, and hold your trade at home.

When a customer calls for some article that you do not carry regularly in stock, show him the large assortment in this **Catalogue**, take his order, guarantee him satisfaction and send it to us by mail.

Your Mail Orders will receive our most careful attention at all times, and we are sure that with the assistance this catalogue will give you, you will find it greatly to your interest to place them in our hands.

TOBOGGANS.

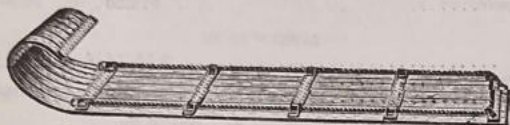

REINFORCED.

Hardwood, Natural Finish, with One Coat of Shellac on Top only; Top Slats screwed on; Heavy Rope secured with Leather Loops; Width about 17½ in.

Made up of Seven Slats, the two outer and center slats are considerably thicker than the other four which adds greatly to strength, decreases running surface, increases speed and makes steering easier in snow; The Long, Graceful Bend causes it to take a jump without jar and makes it run easy in deep snow.
